Star product Star team

Tencent Exmail coming from Tencent's seven star team ——Guangzhou R&D team.

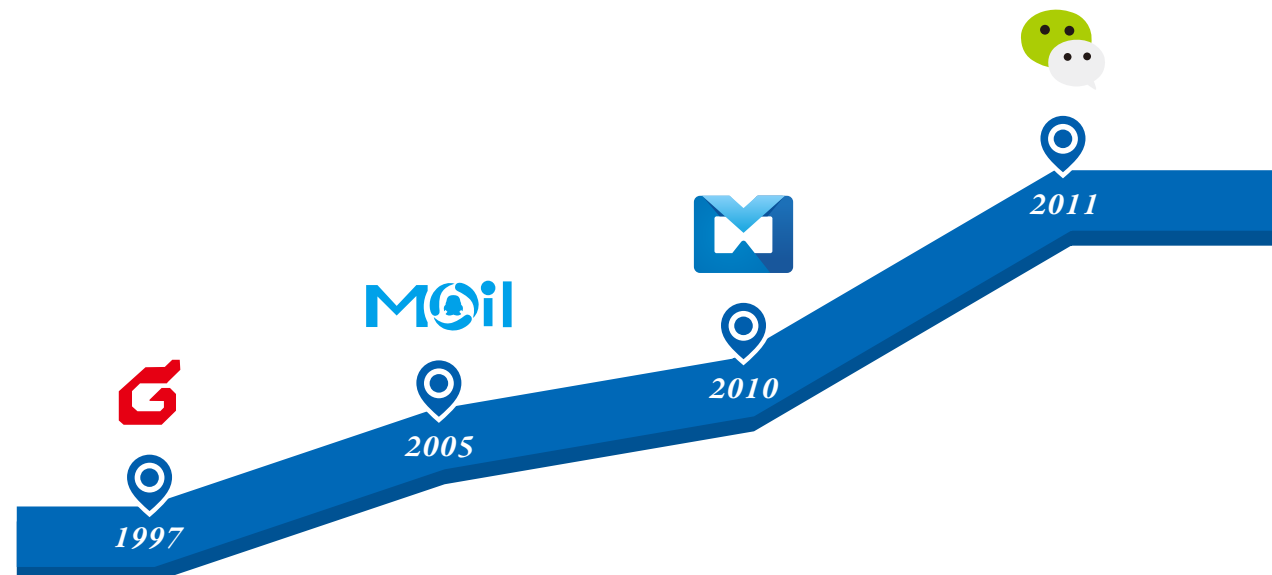

The famous software Wechat, QQ mail and Foxmail are all-star products developed by this team. They gain an admirable reputation from users and industry.

Tencent Exmail is an office email system especially designed for small and medium-sized enterprises. With amounts of experience in developing and operating mail system, the team transfer the stable, simple and fast features from QQ mail into Exmail. Beyond that, Tencent Exmail integrates sharing resource sharing, message delivery and organization management into an enterprise application.

In order to apply mobile office in Wechat, this team has made it a perfect connection with Exmail. In the future, Tencent Exmail can be more multifunctional in office automation combining with Wechat.

Only Exmail can send and receive emails in Wechat

capabilities by admins

Personalized enterprise image

Tencent Exmail allows the company to set their own information like signature line, logo, enterprise card and personalized login page.

Monitoring the whole operation record

Admins are available to check system log like mails sending and receiving, admins' operation record, etc.

Setting up mail archiving

Varied application functions and powerful backstage management functions enhance the mail system overall. For instance, mail archiving function, set up archive account, mail saving forever, etc.

| 微信 通过微信邮箱助手进行来信提醒，只需绑定微信对应的QQ即可。 | ✓ | ✓ | ✓ | ✓ | ✓ | |

High speed network covering all over the world

IDC in China has covered a wide range of network such as China Mobile, China Telecom, China Unicom and education network. IDC abroad has covered the USA, Canada, HK and Southeast Asia. Through dedicated line, it achieves multi-network interconnection, which can bypass the physical bottlenecks between different networks to make sure users can enjoy the same high-speed network from different regions

Exquisite technical experience giving you safest guarantee

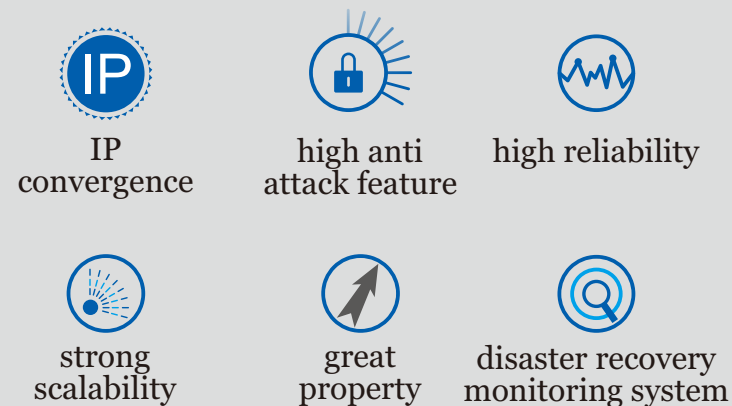

Data hot backup making sure load balance

Key data are 3-machine hot backup in case that one machine breakdown the other two can still work out which totally have no effect on delivering data.

Powerful data disaster tolerance/recovery

Tencent Company launched the development of TGW system independently, which contains the functions of multi-network unified access, load balance automatically, IP convergence and also involves disaster recovery monitor with the advantage of high reliability, strong scalability and great property.

Support from Tencent PC Manager

Tencent PC Manager has an experience on security operation for over 10 years, which gives great support to mailbox from all aspects.

SSL agreement guaranteed

Adopting 128-bit SSL technology to prevent the information from being intercepted and hacked.

Support from Tencent PC Manager

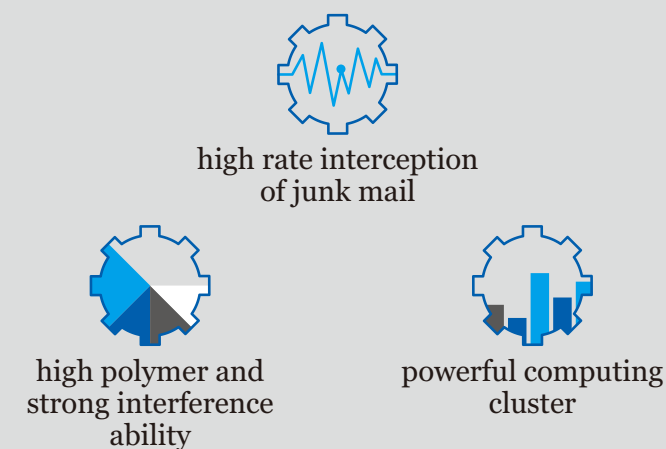

Tencent PC Manager has an experience on security operation for over 10 years, which gives great support to mailbox from all aspects.

Effective Spam SQR

QQ mailbox reporting system as the world largest spam sample collection platform, intercepts almost 100,000,000 spams every day.

It has received dozens of national patent with high polymer and strong interference ability. Besides, its powerful computing cluster also supports images, texts, spam analysis destruction.

It's an entire office automation solution, rather than just a mailbox

Login from Foxmail client

Without configuring account, users can login to Tencent Exmail by using Foxmail client, which can also update address book and calendar real timely and synchronously.

Open up the internal OA system through API

Tencent Exmail not only provides daily mail sending and receiving function, but more devotes to provide an entire solution to office service. Therefore, we involves the function interface and external suite of OA/CRM/ERP based on our basic services to the companies that would like to apply or do secondary development. By doing so, Tencent Exmail can connect with enterprise internal OA system and website perfectly and realize multi-function like account management, mail reminding and quick-login.

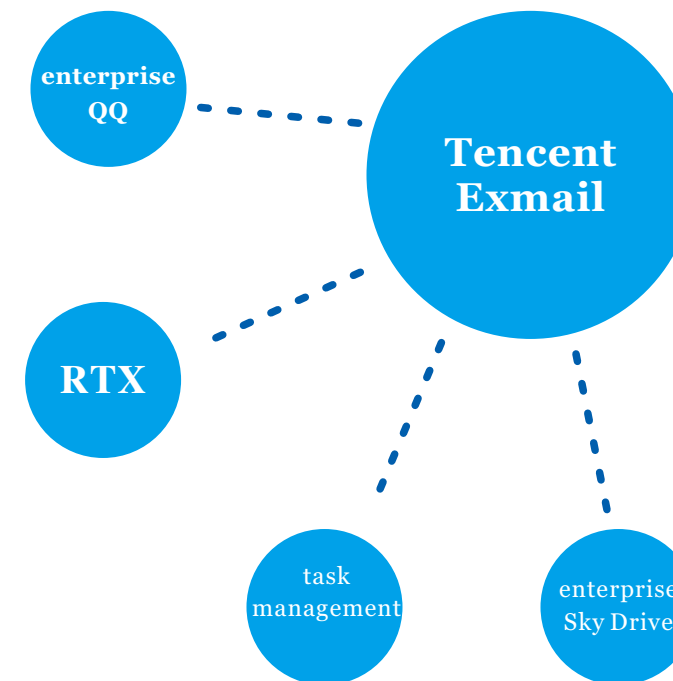

Internal system

Integrated with RTX

Binding with RTX, enterprise QQ and EC client, Tencent Exmail realizes account system and function integration without configuring a new account. Such as quick-login, email reminding, internal communication cooperation, external customer service support and task management, which can easily enhance working efficiency.
